

Technical Data Sheet

NPL-9800UDC Jelly Ink

Introduction

Plastisol for textile screen printing, high transparent, shine surface, excellent elasticity, washing fastness, color value, thickness, 3D effect, meets ISO6330 requirements.

Specification

- Appearance: Milky white clear paste
- Ingredients: PVC powder
- Ion: Anion
- Packing: 20kg PE drum
- Storage: Store air-tight in ventilated area under 35°C, 12 months.

Using suggestion

- Use directly.
- Thinner: Adding NPL-7000 (<15%), NPL-9800RE (< 20%).
- Coloring: Mix with pigment for plastisol (NPC series), adding <10%.
- Curing: 150~160°C, 3-4 mins.

Remarks

- Products are used for textile printing for water based only; must be stored air-tight after opening to prevent property changes.
- Customer is always recommended to perform test prior to bulk application.
- This TDS is meant as a reference, not a warrantee.
- After six to eight months of storage, please shake well before use. Sediment or oil-water separation is normal. It will not affect or change the quality.
